The Baltic Sea anomaly refers to interpretations of an indistinct sonar image taken by Peter Lindberg, Dennis Åberg and their Swedish "Ocean X" diving team while treasure hunting on the floor of the northern Baltic Sea at the center of the Gulf of Bothnia in June 2011. The team suggested their sonar image showed an object with unusual features of seemingly non-natural origin, prompting ...

Baltic Sea anomaly - Wikipedia

The Baltic states are bounded on the west and north by the Baltic Sea, which gives the region its name, on the east by Russia, on the southeast by Belarus, and on the southwest by Poland and an exclave of Russia. The underlying geology is sandstone, shale, and limestone, evidenced by hilly uplands that alternate with low-lying plains and bear mute testimony to the impact of the glacial era.

The website Life's Little Mysteries published a story by Natalie Wolchover on August 30 titled "'Mysterious' Baltic Sea Object Is a Glacial Deposit." Wolchover points out claims by Ocean X Team that an expert has been unable to explain the mysterious object. After contacting that same witness, Wolchover alleges that neither this expert, "nor any of the other experts contacted about ...

The continuing saga of the Baltic Sea UFO | Openminds.tv

As the Baltic Sea is rather small, swell dies out in a day or two, so the sea is rough mainly when the wind actually is strong. Many of the Baltic ferries are very large, with stabilisers or similar arrangements to reduce rolling, and on these rolling is gentle except in very rough seas.

Baltic Sea ferries - Travel guide at Wikivoyage

Baltic Sea Anomaly Update. Lindberg and Åsberg haven't posted any updates to the Ocean X page in a few years, however a YouTube video from 2012 appears to show another trek down to the anomaly in a submarine rover.. Unfortunately, the video doesn't provide much in the way of answers or even anything visually distinctive, as there's a lot of sand and dust kicked up, which obfuscates the ...
