The BMW F series is a family of parallel-twin engine dual-sport motorcycles manufactured in Berlin, Germany by BMW Motorrad. Launched in 2008, the range comprises the F650GS, F700GS, F800GS, and F800GSA. In 2012, the F700GS replaced the discontinued F650GS, and in 2013, the F800GSA was introduced with a 24-litre (5.3 imp gal; 6.3 US gal) fuel tank and a larger front fairing and screen.

The F800GS also makes 6ft/lb more torque 1,250rpm higher than the F650, so where the 650 has nothing left to offer beyond 7,000rpm, the 800 still packs plenty of punch.

The BMW F800ST is a sport touring motorcycle, made by BMW Motorrad from 2006 to 2013. Along with the closely related BMW F800S, other bikes in the F-bike range are the dual-sport F800GS, and the naked F800R. It has the same frame, engine, and suspension as the F800S, but differs primarily in fairing design and handlebar type. In 2013 it was replaced by the F800GT.

After I got the F800GS I saw a thread where people have started upgrading the F650GS front forks to accept a set of older Yamaha YZ450F forks. That looks to be a big improvement. Had I done it before I got the F800 I might have held out a little longer. That said, I absolutely love my F800GS.

The F800/F650 have more HP and torque than the air head R100 bikes plus they are chain drive (lose less power than with a shaft) and weigh less than those bikes. I would suggest the F650GS for two up touring. The F650GS develops more HP and torque than the F800 from 0 rpm to approx. 5,000rpm.

Both are based around BMW's then-new F800 chain drive parallel twin powertrain, which debuted in 2006 in the F800S sportster. After that, however, things start to get confusing. In 2008 BMW launched the first F800GS, plus, at the same time, a more budget, novice-friendly variant using the same engine and capacity but with softer performance called the F650GS.

Does the lowered F800 have a higher clearance level than the standard F700GS/F650GS? I have had my F650GS twin since 2008 and been  
wondering about getting a lowered F800GS, but i want to know if there is any advantages to the clearance level.
