Data-Driven Network Analysis. Phase III of the project consists of the following main headings at the minimum; Introduction, Results, Discussion of the Results, and the Conclusion. References and appendixes are also necessary.

Data-Driven Network Analysis - Essay Paper

Abstract. In this paper, we propose a data-driven network analysis based approach to predict individual choice sets for customer choice modeling in engineering design. We apply data analytics to mine existing data of customer choice sets, which is then used to predict choice sets for individual customers in a new choice modeling scenario where choice set information is lacking.

A data-driven network analysis approach to predicting ...

Data-Driven Solutions to Transportation Problems explores the fundamental principle of analyzing different types of transportation-related data using methodologies such as the data fusion model, the big data mining approach, computer vision-enabled traffic sensing data analysis, and machine learning.
