(tentative title), which chronicles my healing journey through PTSD, I identify 7 Feedback Loops that act like quicksand, pulling one further into PTSD even as one desires to find one's way out. This needs further research, but feedback loops could be one reason some cases of PTSD become chronic.

7 PTSD Feedback Loops - The Art of Healing Trauma

A head injury is any trauma to the scalp, skull, or brain. The injury may be only a minor bump on the skull or a serious brain injury. Head injury can be either closed or open (penetrating). A closed head injury means you received a hard blow to the head from striking an object, but the object did not break the skull.

...

Since the cycle of healing repeated trauma is not linear, the survivor comes to understand that circling back around to a previous stage actually means progress as well as facing new challenges. Ultimately, the healing journey is one of trust as survivors come to trust their capacity to rely on help from others and to trust themselves and the work they have done.
