The answer is infrastructure, or the inner, and sometimes invisible, workings of the city. Roads, railroads, bridges, telephone wires, and power lines are visible elements of the infrastructure; sewers, plumbing pipes, wires, tunnels, cables, and sometimes rails are usually buried underground or hidden behind walls.

Engineering the City: How Infrastructure Works Matthys Levy, Richard Panchyk. I totally agree with the previous reviewer; this is a fun book to read with your kids and do the activities together. It's also perfect for those awkward moments when they ask you a question like, "how does a road work?" and you don't exactly know the answer.

Virtually every piece of infrastructure creates jobs, revenues streams, and investment opportunities, as well as new laws, regulations, and industry standards. The longer a piece of infrastructure is in place, the greater the resistance there is to replacing it. Much like an aging tree, the root system that feeds it becomes enormous.
