The key is to NOT follow the typical advice: get one of your employees licensed, starting flying drones over your sites, then buy more drones. This is an easy way to spend too much money and get little-to-no return. We've got five simple steps to getting started with construction drones. You'll scale drones to your needs, find where they ...

How to Get Started with Drones in Construction

Start off with a cheap toy drone to get the hang of flying, and learn the rules in your country and city. Practice—a lot—in a big open field free of obstacles, like trees, buildings, and telephone poles. Learn basic photography and videography principles, such as balancing exposure, setting white balance, shutter speed, ISO, and composition.
