Introduction to Program Evaluation for Public Health Programs

Public health program planning is rooted in social and behavioral approaches, and evaluation should be done scientifically, which requires students to eliminate any biases they have about the subject or information under evaluation. If you choose to take program planning and evaluation elective courses, you can expect to discuss and research a range of public health issues, including disease prevention, women's reproductive health, domestic and child abuse, mental health awareness and more.

MPH Elective Course: Program Planning | GW Online Public ...

Once the assessment and planning phases have been conducted, and interventions have been selected for implementation, the final stage of designing a workplace health program involves decisions concerning the monitoring and evaluation of program activities. Just as assessment data are critical for evidenced-based program planning and implementation, so too is evaluation to prove that workplace health interventions have been effective and build the business case for continuing them.

Evaluation | Model | Workplace Health Promotion | CDC

In addition, these data serve an important function in program planning and "formative" evaluation by identifying key burden and risk factors—the descriptive and analytic epidemiology of the public health problem. There are limits, however, to how useful surveillance data can be for evaluators.

Program Evaluation Guide - Introduction - CDC

Effective program evaluation is a systematic way to improve and account for public health actions by involving procedures that are useful, feasible, ethical, and accurate. The Framework for Evaluation in Public Health [1] guides public health professionals in their use of program evaluation. It is a practical, nonprescriptive tool, designed to summarize and organize essential elements of program evaluation.

Framework for Program Evaluation - CDC

Evaluation and Program Planning is based on the principle that the techniques and methods of evaluation and planning transcend the boundaries of specific fields and that relevant contributions to these areas come from people representing many different positions, intellectual traditions, and interests.
