Examines identity development in youth in foster care and provides a literature review and discussion of policy, practice, and law related to supporting these youth as they build a sense of self. The report also includes recommendations for those working in the field of child welfare on how to better assess, strengthen, and support identity development in youth in foster care.

Support Services for Youth in Transition: Identity Formation

Abstract. The large body of literature on adolescent identity formation, pre-dating and found largely outside the main body of positive youth development (PYD) literature, shows that identity formation remains a key process for adolescent well-being. This paper revisits the critical adolescent task of identity formation proposed by Erikson (1950) and outlines an alignment of identity formation with adolescent thriving and PYD.

Supporting Adolescent Exploration and Commitment: Identity ...

The study also found a moderate relationship between identity achievement and ego development (mean OR = 2.15), meaning that the odds of being in a postconformist level of ego development were over two times greater for those in the identity achievement status than remaining identity statuses.

Identity Development in Adolescence and Adulthood - Oxford ...

Identity formation, also known as individuation, is the development of the distinct personality of an individual regarded as a persisting entity (known as personal continuity) in a particular stage of life in which individual characteristics are possessed and by which a person is recognized or known (such as the establishment of a reputation).

Identity formation - Wikipedia

A teen's identity is the result of various internal and external factors. Though a teen has some control over their identity development, teen identities are also formed by environmental forces outside of their control: peers, family, school, ethnic identity, and other social environments.

Identity formation, youth, and development : a simplified ...

Despite the fact that identity development occurs throughout one's lifetime, adolescence is the first time that individuals begin to think about how our identity may affect our lives [2]. During adolescence, we are much more self-conscious about our changing identities than at any other stage in our lives [3].
