Laryngeal Evaluation: Indirect Laryngoscopy to High-Speed ...

Indirect laryngoscopy: The doctor uses special small mirrors that are put into your mouth to look at your larynx and nearby areas. Both types of exams can be done in the doctor's office. For either type of exam, the doctor may spray the back of your throat with numbing medicine to help make the exam easier.

Tests for Laryngeal and Hypopharyngeal Cancers

Answer: The laryngeal mirror, or indirect laryngoscopy, is recommended for symptoms persisting > 3 weeks; findings in laryngitis include mild to marked erythema of the mucous membrane, which may also be edematous. With reflux, there is swelling of the inner lining of the larynx and redness of the arytenoids.

Indirect mirror laryngoscopy is the traditional modality used to perform laryngeal examinations on dysphonic patients. [1] The rod lens telescope, introduced by Hopkins, has several advantages...

Dynamic Voice Evaluation Using Flexible Endoscopy ...

Answer: The laryngeal mirror, or indirect laryngoscopy, is considered an integral part of an otolaryngologic examination and should never be billed if an evaluation and management service is also performed, says Susan Callaway, CPC, CCS-P, an independent coding and reimbursement specialist and educator in North Augusta, S.C.

Reader Question: Indirect Laryngoscopy With E/M ...

Thus intubation of the trachea when direct laryngoscopy yields a Cormack-Lehane IV may not be impossible; indeed, it may not even be difficult when an indirect method is used. 7,20 The Cormack-Lehane view continues to be useful as a description of the laryngeal view achieved, but it is no longer a surrogate for the ease of intubation.

Preparation for and Management of "Failed" Laryngoscopy ...

Although the location of these structures often precludes direct visualization, simple techniques can be used to evaluate these anatomic structures in the clinical setting. Indirect laryngoscopy...

Examination of the Larynx and Pharynx | NEJM

For an indirect laryngoscopy, the doctor aims a light at the back of the throat, usually by wearing headgear that has a bright light attached, and uses a small, tilted mirror held at the back of the throat to see the vocal cords. Here we'll focus on direct laryngoscopy. Why do you need a laryngoscopy?

Otolaryngology | Laryngeal Evaluation

Although indirect laryngoscopy is a "low-tech" method of laryngeal evaluation, facility with the technique requires significant practice, and most physicians have abandoned it in favor of the easily performed and well-tolerated flexible laryngoscopy. As a result, indirect laryngoscopy is rapidly becoming a lost art.

Indirect Laryngoscopy | Ento Key

During video laryngoscopy (VL) with angulated or hyper-curved blades, it is sometimes difficult to complete tracheal intubation despite a full view of the larynx. When using indirect VL, it has been suggested that it may be preferable to obtain a deliberately restricted view of the larynx to facilitate passage of the endotracheal tube. We used the GlideScope® GVL video laryngoscope (GVL) to ...
