The Leica DMIL is designed for brightfield, phase contrast, Integrated Modulation Contrast (IMC) and incident light fluorescence. All infinity-corrected high performance objectives in the Leica range with 25 mm screw thread are compatible with the DMIL microscope. Even earlier-type Leica objectives can be adapted for use on the DMIL.

The Leica DMI1 is easy to use for phase contrast observation. With Leica Microsystem's new 40x PH1 objective you can switch from 10x to 20x to 40x phase contrast by simply swiveling the nosepiece. There is no need to change the light ring in the slider - the PH1 light ring matches all three objectives! Cost Saving, Color Safe LED Illumination
