Membrane engineering: Latest advancements in gas ...

Thus, it is not necessary to completely revise how membranes are produced. Simply by adding a coating step, many different types of existing membranes can be modified to resist fouling by oily components. Another example of fouling that significantly limits the use of

In the desulfurization process for purification of coking gas, a huge amount of wastewater is generated. In order to recover the usable substances such as suspended sulfur (SS) and ammonium salts, e.g., $(\text{NH}_4)_2\text{S}_2\text{O}_3$ and NH_4SCN , in the wastewater and also to avoid severe environmental problems in the case of improper disposal, an
