## **Getting Pregnant Naturally - NaturalFertilityShop.com**

Infertility is a condition that affects approximately 1 out of every 6 couples. An infertility diagnosis is given to a couple that has been unsuccessful in efforts to conceive over the course of one full year. When the cause lies with the female partner, it is referred to as female infertility. Female infertility factors contribute to approximately 50% of all infertility cases, and infertility in women accounts for approximately one-third of all infertility cases.

## **Infertility in Women :: American Pregnancy Association**

Yale University School of Medicine conducted a study of 67 infertile women, where it was discovered that a mere 7% had normal Vitamin D levels. Food sources: Eggs, fatty fish, dairy, and cod liver oil. You can also get vitamin D from sitting out in the sun for 15 to 20 minutes per day, but absorption is impacted by the darkness of your skin.
