Nervous System Anatomy, Diagram & Function | Healthline
That network -- your nervous system -- has two parts: Your brain and spinal cord make up your central nervous system. The nerves in the rest of your body make up your peripheral nervous system.

Nervous System (Human Anatomy): Functions, Organs, Diseases
Initially thought to be restricted to the respiratory system, we now understand that coronavirus disease 2019 (COVID-19) also involves multiple other organs, including the central and peripheral nervous system. The number of recognized neurologic manifestations of SARS-CoV-2 infection is rapidly accumulating.

COVID-19: A Global Threat to the Nervous System - Koralnik ...
Nervous tissue, present in both the CNS and PNS, contains two basic types of cells: neurons and glial cells. A glial cell is one of a variety of cells that provide a framework of tissue that supports the neurons and their activities. The neuron is the more functionally important of the two, in terms of the communicative function of the nervous system.
