Oracle Application Framework Personalization Guide

OA Framework includes the OA Personalization Framework which allows you to personalize an Oracle E-Business Suite application page without modifying any underlying code.

Personalizing the appearance of or the data displayed in an OA Framework-based

Access PDF Oracle Application Framework Personalization

page is easy and straightforward.

Oracle Application Framework Personalization

Access PDF Oracle Application Framework **Guide**

Oracle E-Business Suite applications are currently shipped with Oracle's corporate Browser Look-and-Feel (BLAF), which supplies a rich set of components for web-based applications. Although OA Personalization Framework provides you with the ability to change the look of a page by changing user interface (UI)

Access PDF Oracle Application Framework

component properties, adding UI components, and so on, it does not allow you to create and apply an entirely new Look-and-Feel to an application.

Oracle Application Framework Personalization Guide

For additional information, refer to Chapter 4: Implementing Specific UI Features:

Framework Personalization and Extensions for OAF Pages Developer Guide III

In OAF the page definitions are stored in JDR tables normally called MDS repository. In the standard application sometimes customer wants some degree of changes in the display/ functionality. OAF has a mechanism called Personalization to achieve

Access PDF Oracle Application Framework

this. Personalizations are also stored in MDS but a layer above the page definition. So it is upgrade safe.
