You simply need to register and activate your free account, browse through the categories or search for eBooks in the search bar, select the TXT or PDF as preferred format and enjoy your free read.

Piper Dakota Pa 28 236

In 1977, Piper stopped producing the Cruiser (140) and Pathfinder (235), but introduced a new 235-hp (175-kW) plane, the Dakota (PA-28-236), based on the Cherokee 235, Charger and Pathfinder models, but with the new semi-tapered wing. The PA-28-201T Turbo Dakota followed the introduction of the PA-28-236 Dakota in 1979.

The PA-28-236 Dakota is a four-seat aircraft, with fixed landing gear, powered by a 235 horsepower Lycoming O-540-J3A5D engine. The PA-28-201T Turbo Dakota is a four-seat aircraft, with fixed landing gear, and a turbocharged Continental TSIO-360-FB engine of 200 horsepower. Piper introduced the new 235 horsepower Dakota in 1977.

PIPER DAKOTA SERIES Aircraft For Sale - Used & New 1 - 6

That's exactly what Piper did in 1964 when they introduced the airplane that was to evolve into the Piper Dakota. Technically, that first airplane was called the Cherokee 235 (duh!), but it was to be improved and modified to become the PA-28-236, strongest and most capable of the four-seat Cherokee single family.

PIPER DAKOTA Aircraft For Sale - 7 Listings | Controller.com

The PA-28-236 Dakota was, like the Warrior, a warming over of the basic airframe with special attention given to the wing. The Dakota got the semi-tapered wing in place of the 235's aerodynamic slab which, along with a lot of detail engineering and tweaking, made a different airplane out of the old 235.

The next-to-last Cherokee bit the dust last summer when the Cherokee 235 was transfigured to the Dakota (PA-28-236). Piper may not have been thinking of the load-hauling English version of aviation's iron horse, the Douglas DC-3/C-47, when they conjured-up the name-but the new Dakota can do its share.
