Trauma Of The Central Nervous

Apart from the central
nervous system, the
autonomic nervous
system (ANS), is
closely related to how
our bodies respond to

Access Free Trauma Of The Central Nervous System

stress and trauma on an emotional and physiological level. The ANS is comprised of the sympathetic , related to the fight or flight response and release of stress hormones as well as the parasympathetic , which helps to regulate the functions of the sympathetic.

The Effects of Trauma on the Nervous System

Access Free Trauma Of The Central Nervous System

Trauma. Cellular infiltrates in the CSF of victims of CNS trauma are indistinguishable from the cells seen in subarachnoid hemorrhage and destructive lesions of other etiologies. Thus, red blood cells and macrophages containing hemosiderin or myelin debris are the most common manifestations of trauma in CSF.
